

Illustrator Workshops with *Lauren Mullinder*

School Visits

Workshops and school sessions are available for Junior Primary to Secondary students. Fun, educational and interactive, sessions involve discussing the process of illustrating a book and hands on drawing workshops, focusing on creating engaging characters from the imagination.

Workshops and sessions can be tailored for Kindy/Reception to Year 7 and above. Sessions can be themed on request to fit with school events, projects and curriculum.

Custom Programs

Custom programs can also be curated, designed in partnership with schools for more detailed and technical learning.

Sessions focus on learning the fundamentals of shape language, layout and design, to create engaging characters, creatures and landscapes from the imagination and real life. The importance of narrative storytelling in illustration is discussed and potential careers within the arts and creative industry are explored.

Programs can run from a single day workshop to term length programs and can accommodate both traditional and digital drawing platforms. Recommended ages for these workshops are years 3/4 and above.
